

## Aftermarket Solutions from WIKAI Mobile Control

### qSCALE maestro: LMI Upgrade Solution

- Upgrade existing DS150G, DS350G/GW & maestro systems
- No re-calibration required
- Uses existing data software (software conversion by WIKAI required)
- Displays actual & allowable load, boom length, boom angle & load radius
- Integrated Light-bar and Event Recorder

### PRS90: Hardwired / Wireless Multi-Sensor Indicator

- 4.3" or 7" Color display
- Monitors & displays the status of up to 8 sensors at one time (this includes any combination of wireless and/or hardwired sensors)
- Sensors include load, boom angle, wind speed, length, & anti-two block
- Meets requirements in hydraulic & lattice applications

### qSCALE Ix: Load Moment Indicator

- Flexible load moment indicator for mobile cranes
- Superior HMI graphics with 4.3" & 7" display options
- System supports wireless & hardwired sensors
- Easy to use Configuration Tool
- Simplified calibration procedure

Strongco Crane Group proudly carries the WIKAI Mobile Control (formerly Hirschmann / PAT) product line and components. Whether you require hardwired or wireless, WIKAI Mobile Control has what you need to make sure your crane is equipped with the latest in LMI technology.

Make Strongco your dealer of choice for all your WIKAI Mobile Control needs.
